HOW TO SUPPORT US?

The Mauritian Wildlife is seeking funds so as to carry out different conservation and sensitisation projects. We are convinced that everyone, at their respective level and in their own way, can contribute to safeguarding our national heritage. This can be done:

AS AN INDIVIDUAL:

- By becoming an employee or volunteer
- By visiting Ile aux Aigrettes with your family or friends
- By becoming a supporter of the Mauritian Wildlife
- By making a donation (in cash or in-kind)
- By purchasing Mauritian Wildlife products available through our shops
- By subscribing to our 'Adopt an Animal' programme

Café Marron (Rodrigues)

PROJECT APPEALS

At the beginning of every year, the Mauritian Wildlife sends project appeals (detailed presentations of conservation projects, objectives, beneficiaries, equipment, required resources and budgets) to companies.

These documents allow companies to have an accurate picture of the substantial work done by the NGO and the reasons why we need support.

THROUGH YOUR ORGANISATION:

- By offering a financial contribution from your CSR (Corporate Social Responsibility) budget
- By creating a marketing partnership
- By donating equipment or supplies
- By participating in an activity with your colleagues

TAILOR-MADE AGREEMENTS

In a changing environment, the Mauritian Wildlife is aware that it must be proactive in order to offer all firms the opportunity to be part of an ecological and environmental initiative.

To that end, we wish to be sensitive to the concerns of the actors of our society. That is why we seek to meet CSR leaders to discuss about the most effective ways to establish a partnership matching their philosophy.

SUPPORT WILDLIFE SUPPORT US

MAURITIAN WILDLIFE FOUNDATION

The Mauritian Wildlife Foundation (Mauritian Wildlife) is a local Non-Governmental Organisation (NGO) established since 1984. It played a major role in saving the country's critically threatened flora and fauna from extinction since, and has gained international recognition in doing so.

Through its nature conservation programmes, the NGO has been a catalyst in working in partnership with private, public and community stakeholders in its mission towards sustainable development.

OUR CONSERVATION PROJECTS

Pink pigeon

OUR ACTIONS

The Mauritian Wildlife's actions revolve around 20 projects, including the preservation of rare plants, endemic birds and reptiles, and the restoration of islets.

We are the largest NGO that covers a wide range of environmental actions in the Republic of Mauritius such as:

- the preservation of endangered endemic plant and animal species of Mauritius,
- the restoration of several islets (in particular Ile aux Aigrettes, Ile de la Passe and Round Island),
- the restoration of the fauna and flora of Rodrigues.

Our staffs at work in Anse Quitoir Nature Reserve

OUR CONSERVATION WORK

The conservation work started in the 1970s, and which was intensified since 1984, allowed us to save the Echo Parakeet, the Pink Pigeon and the Mauritius Kestrel from extinction, projects which gained international recognition.

Orange-tailed skink

OUR OBJECTIVES

- Saving endangered Mauritian species through whole ecosystems restorations,
- Collecting information through field research, data management, captive species studies, and also promote scientific collaboration so as to adopt effective restoration methods and management approaches.

OUR AWARENESS PROGRAMS

Students visiting Ile aux Aigrettes (Learning with Nature Education Programme)

GUIDED VISITS

One of the Mauritian Wildlife's mission is to share the delights and benefits of our endemic nature with all Mauritians.

In this context, the NGO organises guided visits (EcoTours) on Ile aux Aigrettes (Mauritius) and at the Grande Montagne Nature Reserve (Rodrigues). We also offer other tours in Black River Gorges National Park. Please consult our website for more info.

SENSITISE THE YOUTH

The Mauritian Wildlife attaches considerable importance to raising awareness amongst youngsters on environmental respect and conservation.

We have thus developed a sensitisation programme, focusing on young people aged from 8 to 17 years old, entitled "Learning with Nature" in Mauritius and "Rodrigues Environmental Education Project" for Rodrigues.
